

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Titan Mazarin Balanced Fund Class A Shares

A Sub-fund of the IFSL Titan NURS OEIC (ISIN Income GB00BGGJHV29, Accumulation GB00BGGJHT07)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

Objective: The aim of the Fund is to provide capital growth, that is, to increase the value of your investment, over a minimum of 5 years. The Fund aims to have an average yearly volatility (a measure of the size of short term changes in the value of an investment), below 12% per year, over any 5-year period. This may limit the potential for capital growth. There is no guarantee that the Fund will meet its investment objective or volatility target and investors may not get back the amount invested.

Management style: The Fund is actively managed, which means the Investment Manager decides which investments to buy and when.

Policy: At least 70% of the Fund's assets will be invested in other collective investment schemes, closed-ended funds and exchange traded funds, collectively known as 'Investment Funds'. This could include other Investment Funds managed by the same Authorised Corporate Director and/or Investment Manager.

The Fund will invest in a range of different asset classes, across different regions and industries. Chosen investments are based on predicted volatility within asset classes and global markets, using information and research provided by an independent asset allocator. The asset class exposure will include a mix of investments including shares in companies, derivatives, government and corporate bonds (both investment grade and sub-investment grade), money market funds and real assets such as property and commodities (e.g. gold, silver and oil). The Fund uses EValue as its independent asset allocator.

In addition to the above, the Investment Funds may also hold other permitted

investments such as money market instruments and structured products (a type of fixed-term investment where the amount you earn depends on the performance of a specific market or a specific asset). Investment Funds may be actively managed, or passively managed (tracking an index).

The Fund may also invest directly in bonds issued by companies, shares in companies, and structured products. The Fund is permitted to use derivatives and forward transactions linked to exchange rates in order to reduce currency risk. The Fund may also use derivatives to gain exposure to currencies however this is expected to be infrequent and will not form a significant part of the investment strategy.

The Fund will be fully invested except for cash reserves to settle liabilities (including redemption of shares) and for general efficient management or in relation to strategic objectives. Cash balances may be higher in extreme market conditions.

Assessing performance: You may want to assess the Fund's performance compared to the IA Mixed Investment 40-85% Shares sector. Due to the Fund's aim to limit the Fund's volatility to an average of 12% per year over five years, investors should note that this may impact upon the Fund's returns compared to other funds that are not constrained by the same target.

Other information: If you invest in income shares, income from investments in the Fund will be paid to you. If you invest in accumulation shares, income will be added to the value of your shares. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

Investments can go up and down in value and you could get back less than you put in.

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

Market risk: The Fund is exposed to financial markets, and market conditions can change rapidly and without warning.

Smaller company risk: The Fund may be exposed to shares of smaller companies, which are typically riskier and harder to sell in difficult market conditions, compared to larger, more established companies.

Emerging market risk: The Fund may be exposed to emerging markets (a fast-growing economy with increased global trade, but isn't yet considered fully developed). Investments in these countries can be more volatile and less predictable than in more established markets, increasing risk.

Fixed income risk: The Fund may be exposed to bonds. The value of these

investments can rise or fall due to factors including interest rates, inflation expectations and concerns about the borrower's ability to repay.

Foreign exchange (currency) risk: The Fund may be exposed to overseas markets and may be affected by changes in currency exchange rates.

Sub-investment grade bond risk: There is a greater chance that sub-investment grade bond issuers may not be able to pay income or repay the debt.

Liquidity risk: In difficult market conditions, the Fund may struggle to sell some investments at a fair price, or at all, due to reduced availability of buyers and sellers. This could reduce the Fund's value if investments cannot be sold at a fair price or may cause delays in getting your money back, when you want to sell.

Counterparty risk: The Fund relies on banks and other financial firms to carry out certain services. If one of these firms fails to meet its obligations, the Fund could lose money.

Derivative risk: The Fund may use financial contracts (known as derivatives) to manage risks, reduce costs, or improve returns. However, these strategies may not work as intended.

Operational risk: Failure in systems, people, or processes connected with the Fund's operation, including those related to the safekeeping of the Fund's investments, could lead to losses or inconvenience for investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/05/2026. The OCF figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 26 - 29 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.95%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Historic performance to 31 December 2025

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up and you may get back less than you put in.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 1 July 2019.

This share class was launched on 1 July 2019.

Benchmark: IA Mixed Investment 40-85% Shares.
