a sub-fund of Tideway UCITS Funds ICAV (the "ICAV")
The Fund is managed by Waystone Management Company (IE) Limited.

Class D EUR Income Shares (ISIN: IE00BD9H0Q84)

Objective & Investment Policy

Objective

The Fund aims to generate 5% per annum income, net of all expenses, from a hybrid capital portfolio with medium volatility. (As described under the heading Investment Policy below).

Investment Policy

The Fund is actively managed and will invest in debt securities which are listed or traded on Recognised Exchanges worldwide. The investments of the Fund represent a hybrid capital portfolio. Hybrid capital is defined as a debt instrument ranking below ordinary senior debt but above common equity.

Other features of the Fund:

The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The core focus of the Fund is to invest in subordinated debt issued by large, household name companies.

There is no geographical, industry or sectoral focus to the Fund and there is no restriction on the duration of the Fund.

There will be no short positions in the Fund.

The Fund may invest in Contingent Convertible Securities (CoCo's) up to 30% of Fund's overall exposure. A CoCo is a debt security that is intended to either convert into equity or have its principal written down upon the occurrence of certain triggers.

The Fund may invest up to 100% in debt securities which are classified as high yield/sub-investment grade with a credit rating at best of BB+/Ba1 or below.

The Fund may invest up to 30% in debt securities issued by a sub-investment grade company i.e. the issuer is sub-investment grade, with a credit rating at best of BB+/Ba1 or below.

The Fund may hold up to 25% in sub-investment grade debt securities which have a credit rating of B+/B1 or below where this credit rating has arisen as a result of a credit rating downgrade from a higher credit rating.

The Fund may not purchase sub-investment grade securities which have a credit rating of B+/B1 or below.

The Fund may also invest up to 30% of its Net Asset Value in ordinary preference shares which are a hybrid form of equity with payments and capital repayment ranking senior to common equity dividends.

Depending on the market conditions, the Fund may at any time at the Investment Manager's discretion take a defensive investment strategy and move up to 50% of the portfolio (i.e. up to 50% of its net asset value) to cash or cash equivalents.

You can buy and sell shares in the Fund on each business day in Dublin and London.

This share class distributes quarterly dividends to Shareholders at an annualised rate of 5%, if the Fund generates sufficient income.

The Fund may utilise derivatives (i.e. foreign exchange forwards) for currency hedging purposes. Derivatives will not be used for investment purposes. The Manager will ensure that the use of derivatives does not materially alter the overall risk profile of the Fund.

More information on the management of this portfolio may be obtained from the address provided in the 'Practical Information' section below.

Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 3 because its volatility has been measured as medium to average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the Fund will achieve its objective and you may get back less than you originally invested.

The risk and reward indicator does not take into account the following risks:

- The Fund may invest in higher risk bonds which have a greater risk of default than lower risk bonds.
- The use of derivatives may result in the Fund being leveraged whereby the exposure of the Fund as a result of all positions held by it may exceed its Net Asset Value and may result in gains or losses that are greater than the original amount invested.
- The Fund is suitable for investors with a medium to long term holding period and who have a moderate to high risk appetite.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.
