

TWP Sustainable Balanced

Portfolio Objectives

The Sustainable Balanced portfolio aims to achieve long-term capital growth by investing across a selection of funds that we believe, in aggregate, address global social and environmental challenges through Doing Good, Avoiding Harm and Leading Change.

Costs and Charges for Manufacturing and Managing the Fund (deducted from returns of fund)*

Underlying Holding Charge**	0.54%
-----------------------------	-------

Commentary

The second quarter was characterised by persistent inflation, uncertain central bank policy and moderate, but slowing, economic growth. Markets were volatile, driven by elevated energy prices and geopolitical tensions, before stabilising towards the end of the period. Against this backdrop, equity markets delivered positive returns, led by the US, Asia and the Emerging Markets and specifically the technology sectors, while bonds faced a more challenging environment as rate expectations shifted. Portfolio performance benefited from strength in global equities and the advantages of a disciplined, well-diversified approach across asset classes and regions. Positioning remained largely unchanged during the quarter, with a continued focus on quality investments, liquidity and maintaining a balanced allocation to support resilience in uncertain conditions.

	Performance to latest month end				Calendar Year				
	3 Months	1 Year	5 Years	Since Launch	2025	2024	2023	2022	2021
Portfolio	7.4%	11.4%	10.9%	20.3%	7.4%	4.5%	6.1%	-14.9%	9.3%
IA Mixed Investment 20-60% Shares	6.5%	12.5%	22.2%	-	10.2%	6.2%	6.8%	-9.8%	7.5%

Performance data prior to launch date is simulated, based on a real portfolio that Titan Square Mile has run for another client with a similar mandate. The performance start date is 11/02/2020. Simulated past performance data is a guide only and past performance data is not a reliable indicator of future performance. Returns are net of income reinvested and investment management fees in GBP. Performance does not consider platform or adviser fees. Performance numbers are shown in discrete periods. The investment performance may vary depending upon Platform and availability of share classes. Source: Titan Square Mile & LSEG Lipper (all rights reserved).

The Investment Association (IA) is the trade body that represents the UK investment management industry. It publishes data on UK funds and investment trends and oversees fund classifications, including the widely used IA sector classifications for UK funds. The IA Mixed Investment sectors are a way they group multi-asset funds so investors can compare similar funds based mainly on how much equity a fund is allowed to hold.

*The costs and charges of manufacturing the fund will impact the overall return received by investors. Other costs deducted from fund returns are transaction costs which include trading costs, broker commissions and spreads. More information is available on request.

**Underlying Holdings Charge: Weighted average of the OCF (Ongoing Charge Figure) of all holdings. Where OCF is unavailable TER (Total Expense Ratio) is used. The actual charge may vary depending upon Platform and availability of and access to share classes.

*** Historic yield figures will only be provided for funds with at least 12 months of performance history. Where quoted, the yield is the aggregate and weighted position of each underlying fund within the portfolio and is based on the yield published by the manager of each respective fund.

Portfolio Breakdown

SUSTAINABILITY DATA

Commentary

The second quarter was marked by persistent inflation, uncertain central bank policy and ongoing geopolitical tensions, driving periods of market volatility. Against this backdrop, global equity markets delivered positive returns, led by the US, Asia and the Emerging Markets and specifically the technology sectors, while bond markets faced challenges as interest rate expectations adjusted. Performance across the Sustainable portfolios benefited from this equity strength, alongside the resilience provided by a diversified and quality-focused approach. Our emphasis on well-governed, financially robust companies and long-term structural themes supported returns while helping manage downside risk. Positioning remained largely unchanged over the quarter, with portfolios continuing to balance growth opportunities with sustainability considerations and broad diversification across asset classes.

Do Good

Do Good refers to the level of alignment within the portfolio to companies offering solutions to global social and environmental challenges. It is measured according to the 3D Investing methodology, which uses a large data set to individually map lines of revenue of all underlying businesses to environmental and social solutions. The chart below shows the total revenue exposure to the 3D Investing defined solutions of the portfolio versus the Strategic Asset Allocation (SAA), the latter comprising representative index tracking funds and ETFs.

Source: Titan Square Mile. The comparator used reflects the strategic asset class allocation based on the underlying investment exposure of the portfolio to equities and fixed income at the date of data. This information is for illustrative purposes only to provide an indicative comparison to a nonsustainable market equivalent.

Avoid Harm

Avoid Harm refers to the level of exposure to the revenue lines of companies that confer negative contributions to society and the environment. As with Do Good, it is measured according to 3D Investing’s proprietary methodology, individually mapping the revenues of underlying companies to activities our analysts consider harmful, or controversial. The chart below shows the total revenue exposure to the 3D Investingdefined controversial activities and harmful impact of the portfolio versus the SAA, the latter comprising representative index tracking funds and ETFs

Source: Titan Square Mile. The comparator used reflects the strategic asset class allocation based on the underlying investment exposure of the portfolio to equities and fixed income at the date of data. This information is for illustrative purposes only to provide an indicative comparison to a nonsustainable market equivalent.

Lead Change

Lead Change refers to the active role that fund managers play in influencing the companies they invest in. This involves engaging with these companies to encourage improvements in areas like governance, environmental practices, and social responsibility. Our 3D Investing team analyses all rated funds based on their ability to effect positive change through measurable and structured engagements. Fund managers may work independently or collaborate with other investors and advocacy groups to drive positive change. The aim is to ensure that the companies in their portfolios are not only financially strong but also operate in a more sustainable and ethical way. Engagement is key to responsible investing because it helps address longterm risks and opportunities that might not be immediately evident. Through this ongoing dialogue, fund managers can guide companies towards better practices, fostering more sustainable growth over time. However, meaningful change in large organisations takes time, so these engagements often span years rather than fitting into a single quarter. This is why engagement activities aren’t typically reported on a quarterly basis.

Titan Wealth Planning Limited is authorised and regulated by the Financial Conduct Authority, FRN 574458. Registered address: 101 Wigmore Street, London, W1U 1QU. Registered in England and Wales, company registration number 07839452. Exposure to funds managed by Titan Investment Services will not exceed 10% per fund, except for funds containing multiple underlying managers (fund of funds or managers of managers). TISL reserves the right to exit such funds if it is deemed appropriate to do so.
