Portfolio Objectives

Titan Square Mile aims to manage the model portfolio to an estimated volatility range between 5.9% and 7.5% p.a. over a market cycle. This is an estimation driven by capital market assumptions, and therefore not an annual guarantee as market movements may drive different outcomes in the shorter term. The Portfolio will be managed using Titan Square Mile's Growth 2 strategic asset allocation which has a 35% weight to equities. The portfolio will be invested in a mix of equities, fixed income and other defensive assets and the total equity exposure can range between 25% and 40%, at the time of investment. The portfolio may invest in funds managed by firms within the Titan Wealth Group. Titan Investment Solutions Ltd is a wholly owned subsidiary of Titan Wealth Holdings Ltd, part of the Titan Wealth Group.

Commentary

The second quarter was characterised by persistent inflation, uncertain central bank policy and moderate, but slowing, economic growth. Markets were volatile, driven by elevated energy prices and geopolitical tensions, before stabilising towards the end of the period. Against this backdrop, equity markets delivered positive returns, led by the US, Asia and the Emerging Markets and specifically the technology sectors, while bonds faced a more challenging environment as rate expectations shifted. Portfolio performance benefited from strength in global equities and the advantages of a disciplined, well-diversified approach across asset classes and regions. Positioning remained largely unchanged during the quarter, with a continued focus on quality investments, liquidity and maintaining a balanced allocation to support resilience in uncertain conditions.

The Investment Association (IA) is the trade body that represents the UK investment management industry. It publishes data on UK funds and investment trends and oversees fund classifications, including the widely used IA sector classifications for UK funds. The IA Mixed Investment sectors are a way they group multi-asset funds so investors can compare similar funds based mainly on how much equity a fund is allowed to hold.

*The costs and charges of manufacturing the fund will impact the overall return received by investors. Other costs deducted from fund returns are transaction costs which include trading costs, broker commissions and spreads. More information is available on request.

**Underlying Holdings Charge: Weighted average of the OCF (Ongoing Charge Figure) of all holdings. Where OCF is unavailable TER (Total Expense Ratio) is used. The actual charge may vary depending upon Platform and availability of and access to share classes.

*** Historic yield figures will only be provided for funds with at least 12 months of performance history. Where quoted, the yield is the aggregate and weighted position of each underlying fund within the portfolio and is based on the yield published by the manager of each respective fund.
