

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investment Fund Services

IFSL Titan Global Equity Fund X Shares

A Sub-fund of the IFSL Titan UCITS OEIC (ISIN Accumulation: GB00BS1J9M64)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

Objective: The aim of the Fund is to increase in value, over a minimum of 5 years, through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments such as dividends from shares and interest from bonds.

Management style: The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when.

Policy: At least 80% of the Fund will be invested in a range of global shares of companies, also known as equities, across both developed and emerging markets, with no minimum or maximum exposure to any geographic region. This may include exposure through holdings in investment trusts, funds and ETFs/ETCs, although this will not exceed 10% of the Fund.

Up to 20% of the Fund may have exposure to different asset classes including real assets, for example property and commodities (e.g. gold and oil), government and corporate bonds (both investment grade and sub-investment grade) and money market funds. Any exposure to real assets will only be through investment trusts, funds and ETFs/ETCs.

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

The Fund may use derivatives (instruments whose returns are linked to another asset, market or other variable factor) to reduce risk in the Fund (also known as hedging). The Fund will not always hold these instruments however at times they may be held for extended periods.

The Investment Manager's style is biased towards the 'quality/growth' approach

to stock selection which is where the Investment Manager invests in shares of companies that have the potential to deliver strong returns on capital, have low levels of debt and use their strong cash flow to reinvest in their business, compounding the growth of the company. Whilst their approach is focused on quality/growth orientated companies that display these characteristics over time, the Investment Manager will also choose shares of companies that display such characteristics on a temporary basis but are perceived to be good value.

The Investment Manager uses a screening process that ranks companies based on key financial metrics, that they believe are key for quality growth of companies, and then select the top ranked companies from a universe of over 1500 companies for potential inclusion in the Fund's portfolio. With the final decision on inclusion or exclusion of the qualifying quality/growth companies in the Fund's portfolio being driven by the valuation of each of the companies screened.

The Investment Manager also evaluates the weighting to each industry sector and geographic region to assess whether adjustments to the portfolio are required, based on their view of that area. Based on this view the Investment Manager may adjust the investments held to manage risk or to take advantage of market trends.

Assessing performance: The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Global sector. You may want to assess the Fund's performance compared to the performance of this sector.

Other information: Income is not distributed but is rolled up (accumulated) into the value of your investment. You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

Investments can go up and down in value and you could get back less than you put in.

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

Market risk: The Fund is exposed to financial markets, and market conditions can change rapidly and without warning.

Smaller company risk: The Fund may be exposed to shares of smaller companies, which are typically riskier and harder to sell in difficult market conditions, compared to larger, more established companies.

Emerging market risk: The Fund may be exposed to emerging markets (a fast-growing economy with increased global trade, but isn't yet considered fully developed). Investments in these countries can be more volatile and less predictable than in more established markets, increasing risk.

Fixed income risk: The Fund may be exposed to bonds. The value of these

investments can rise or fall due to factors including interest rates, inflation expectations and concerns about the borrower's ability to repay.

Foreign exchange (currency) risk: The Fund may be exposed to overseas markets and may be affected by changes in currency exchange rates.

Sub-investment grade bond risk: There is a greater chance that sub-investment grade bond issuers may not be able to pay income or repay the debt.

Liquidity risk: In difficult market conditions, the Fund may struggle to sell some investments at a fair price, or at all, due to reduced availability of buyers and sellers. This could reduce the Fund's value if investments cannot be sold at a fair price or may cause delays in getting your money back, when you want to sell.

Counterparty risk: The Fund relies on banks and other financial firms to carry out certain services. If one of these firms fails to meet its obligations, the Fund could lose money.

Derivative risk: The Fund may use financial contracts (known as derivatives) to manage risks, reduce costs, or improve returns. However, these strategies may not work as intended.

Operational risk: Failure in systems, people, or processes connected with the Fund's operation, including those related to the safekeeping of the Fund's investments, could lead to losses or inconvenience for investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/05/2026. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.

For more information about charges, please see Section 25 - 27 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge 0.00%

Exit Charge None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges 0.78%

Charges taken from the fund under certain conditions

Performance Fee None

Past Performance

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up and you may get back less than you put in

As the Fund has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 21 February 2025.

This share class was launched on 21 February 2025.
